La absorción de gases nitrosos - procedentes
por ejemplo de la combustión del amoniaco - en agua se

1

[The main body of the document contains extremely faint and illegible text, likely bleed-through from the reverse side of the page.]

The first part of the document discusses the general principles of the law of contract, which are based on the idea of a voluntary agreement between two or more parties. The law of contract is a branch of the law that deals with the legal consequences of such agreements. It is a subject that has attracted the attention of jurists for many centuries, and it has developed into a complex and highly technical body of law.

The second part of the document deals with the formation of a contract. A contract is formed when two or more parties agree to do something or refrain from doing something. The agreement must be made with a certain intention, and it must be supported by consideration. The law of contract is a branch of the law that deals with the legal consequences of such agreements. It is a subject that has attracted the attention of jurists for many centuries, and it has developed into a complex and highly technical body of law.

The third part of the document discusses the performance of a contract. A contract is not complete until it has been performed. The law of contract is a branch of the law that deals with the legal consequences of such agreements. It is a subject that has attracted the attention of jurists for many centuries, and it has developed into a complex and highly technical body of law.

The fourth part of the document deals with the breach of a contract. A contract is breached when one of the parties fails to perform its obligations under the contract. The law of contract is a branch of the law that deals with the legal consequences of such agreements. It is a subject that has attracted the attention of jurists for many centuries, and it has developed into a complex and highly technical body of law.

The fifth part of the document discusses the remedies available for a breach of contract. The law of contract is a branch of the law that deals with the legal consequences of such agreements. It is a subject that has attracted the attention of jurists for many centuries, and it has developed into a complex and highly technical body of law.

The contract is a legal agreement between two or more parties.

The writer of this document is a legal scholar.

155 en agua bajo presión, caracterizado por el hecho de que el agua, respectivamente el líquido de absorción, es llevada al encuentro de los gases introducidos por abajo, dentro de una serpentina colocada verticalmente, en una capa delgada que deja libre la mayor parte de la sección del tubo, realizándose la absorción y la oxidación del NO así formado en proceso de trabajo no escalonado.

160 2º. Un procedimiento según lo reivindicado en el punto 1º., caracterizado por el hecho de que la corriente de gas, respectivamente su energía quinética, es aprovechada para pulverizar el líquido de absorción.

3º. Un procedimiento, para la conversión de gases nitrosos, procedentes en especial de la combustión del amoníaco, en ácido nítrico.

165 Tal y como se ha descrito en la Memoria que antecede, ilustrado en el dibujo que se acompaña y para los fines que se han especificado.

Esta Memoria consta de siete hojas escritas a máquina por una sola cara.
